

4. Median of Two Sorted Arrays

 Description (/problems/median-of-two-sorted-arrays/description/) Hints (/problems/median-of-two-sorted-arrays/hints/) Submissions (/problems/median-of-two-sorted-arrays/submissions/)[Discuss](#) Notes Discuss (<https://discuss.leetcode.com/category/12>) Pick One (/problems/random-one-question/)

There are two sorted arrays **nums1** and **nums2** of size m and n respectively.

Find the median of the two sorted arrays. The overall run time complexity should be $O(\log(m+n))$.

Example 1:

```
nums1 = [1, 3]
nums2 = [2]

The median is 2.0
```

Example 2:

```
nums1 = [1, 2]
nums2 = [3, 4]

The median is (2 + 3)/2 = 2.5
```
